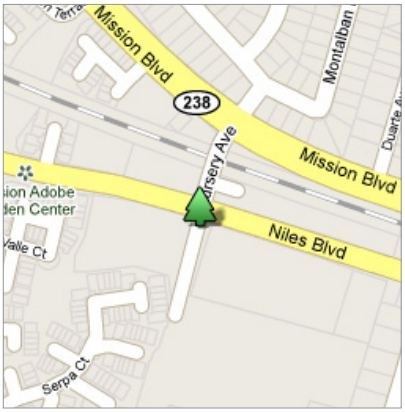
Melaleuca styphelioides
Prickly Paperbark

36501 Niles Boulevard
Niles District



Approximate location on map.

Sessile unstalked leaves with pointy tips.

Photo Taken: July 2010

NIL-10 TREE INFORMATION/August 2010

HEIGHT: Average 60 ft.

SPREAD: Average 39

DBH: Average 4 ft 5 in.

QUANTITY: 2

NATIVE TO: Australia

LANDMARK DATE: March 17, 1972

There are two landmarked Melaleucas located adjacent to one another in the historic California Nursery Company. Each of these Melaleucas has multiple trunks.

The Prickly Paperbark is an evergreen tree native to Australia. It has deep roots, dense pendulous branches, light green leaves and clusters of creamy white flowers that appear from summer through fall.[14]
