

Download VPN software from FTP server

1. Visit <https://cofftp.fremont.gov>

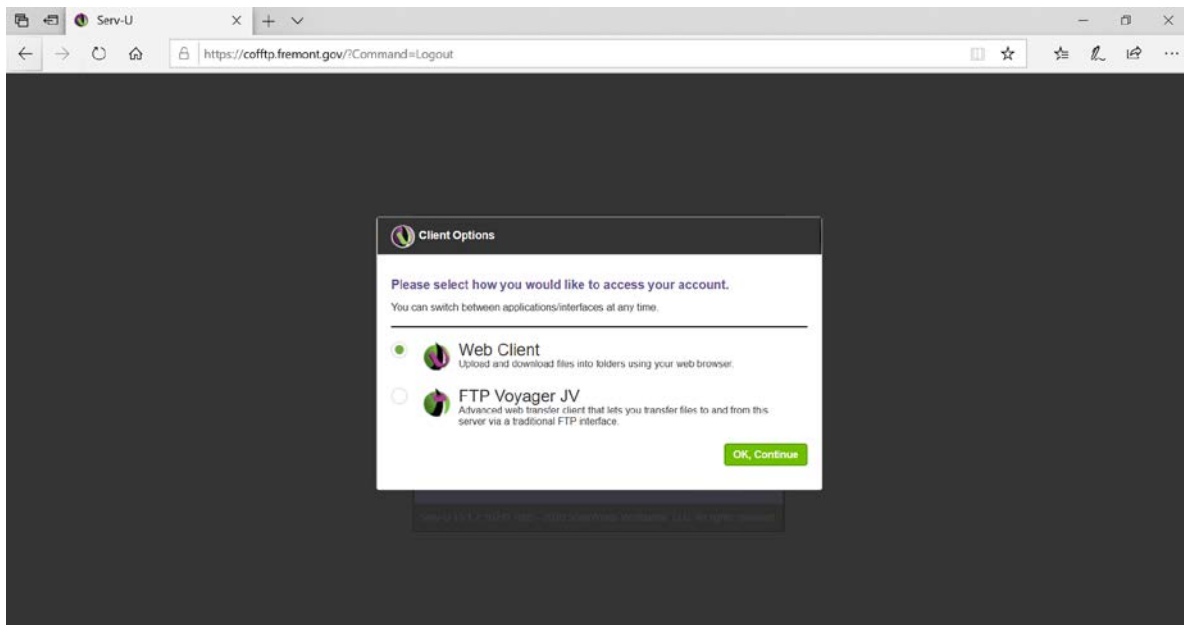

2. Please use the following credentials to log in.

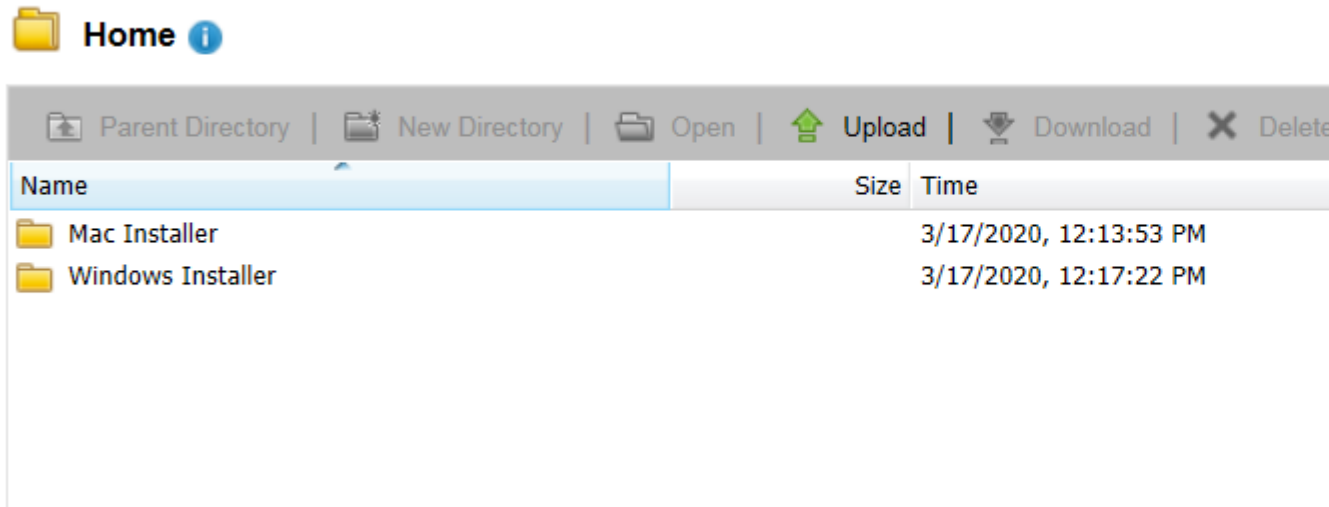

Login ID: cofvpn

Password: 29J2B61w

3. Click on "Ok,Continue"

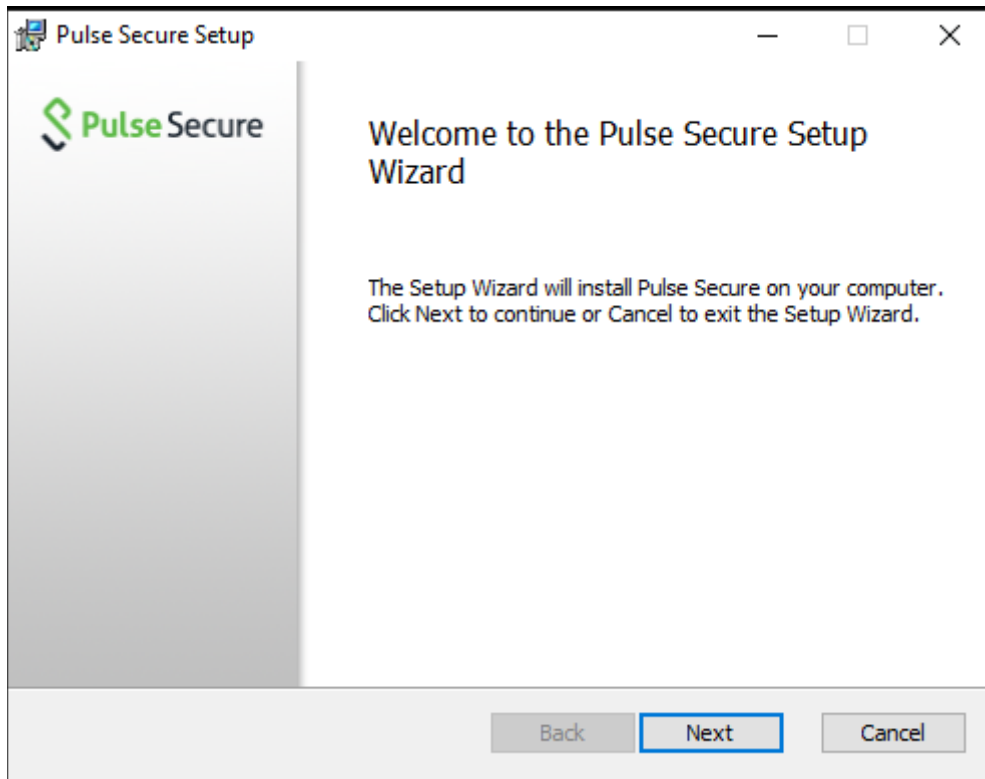

4. Select appropriate Mac or Windows installer and click “Download” to start the download process.

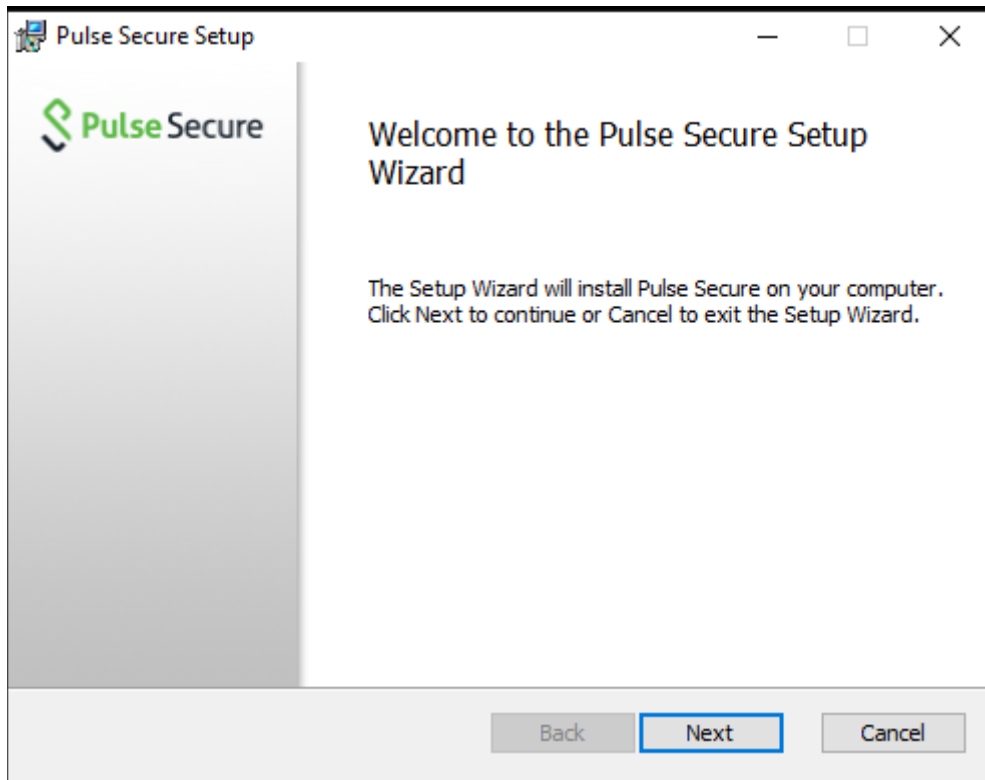

VPN Setup and Configuration

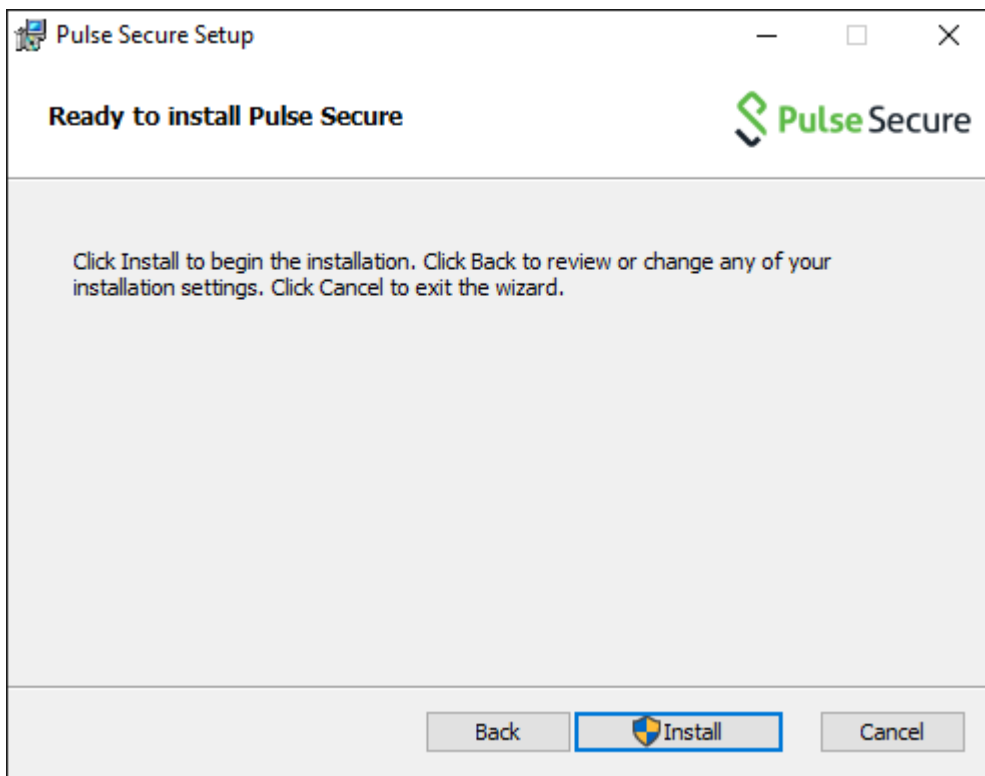

5. Once download is finished, run the setup software.

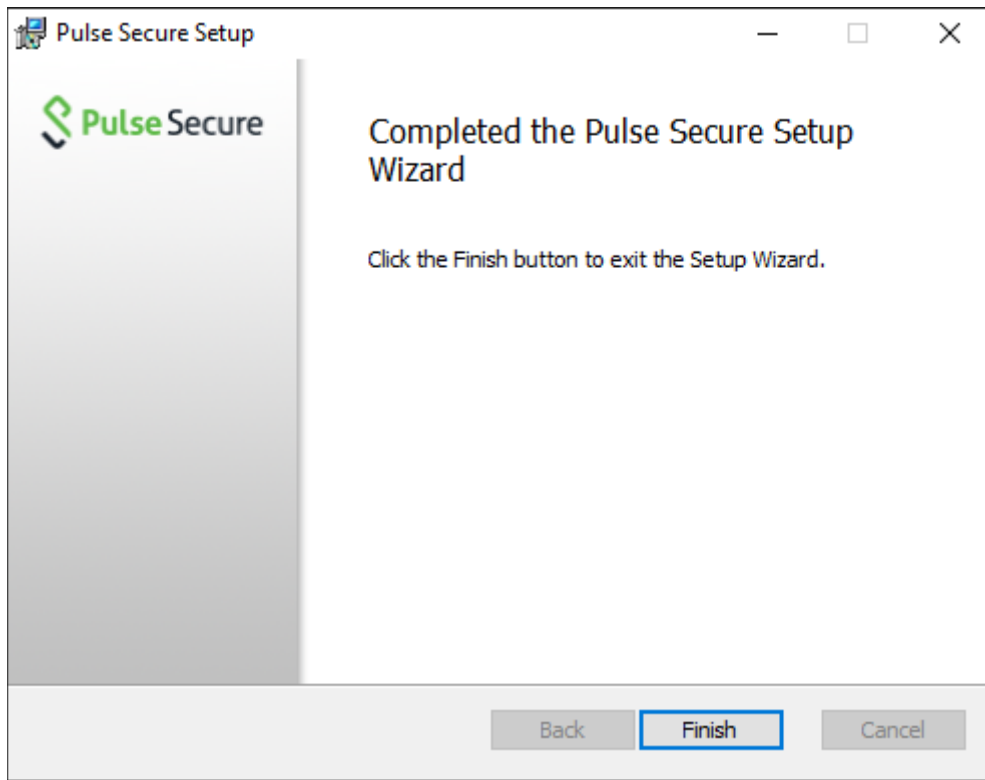

6. Click "Next".

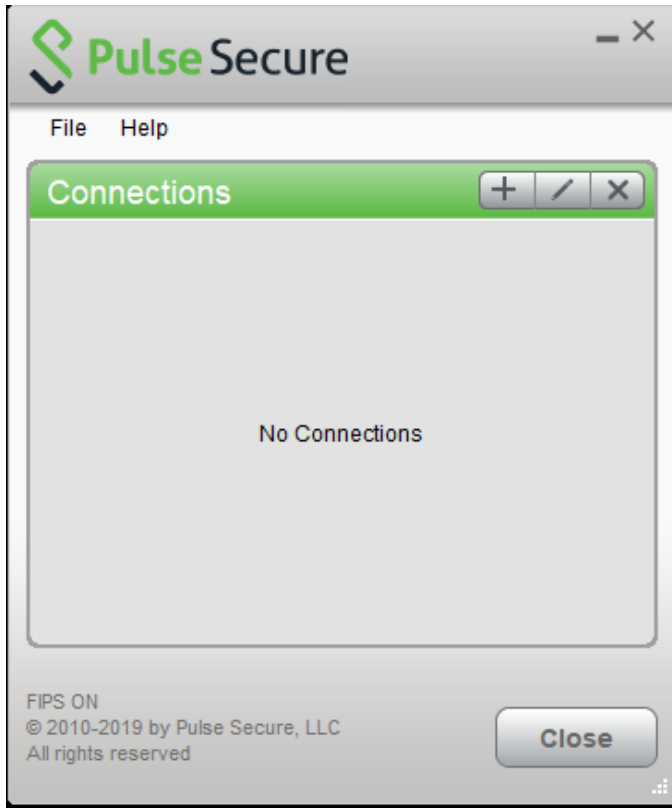

7. Click "Install"

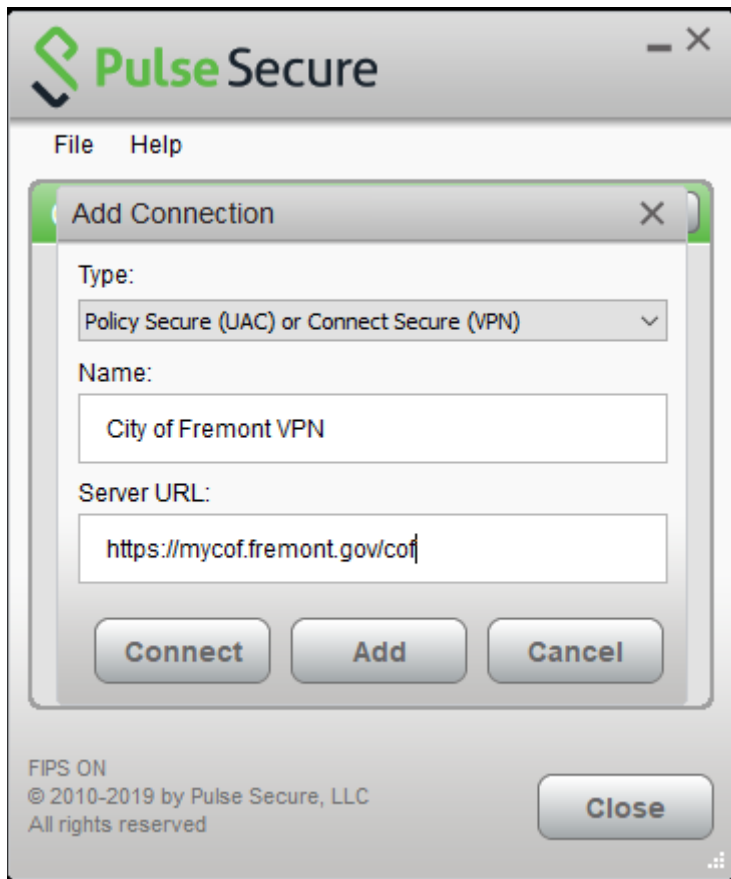

8. Click "Finish"

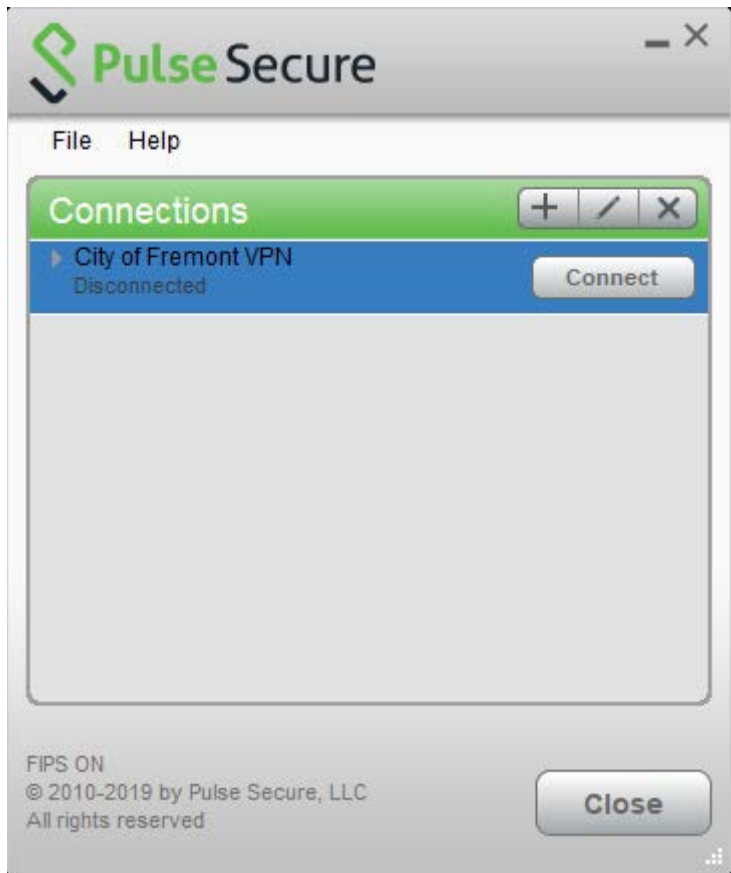

9. Search for "Pulse Secure" in Windows 10 or in Windows 7 and open it. Click the "+" to add a new connection.

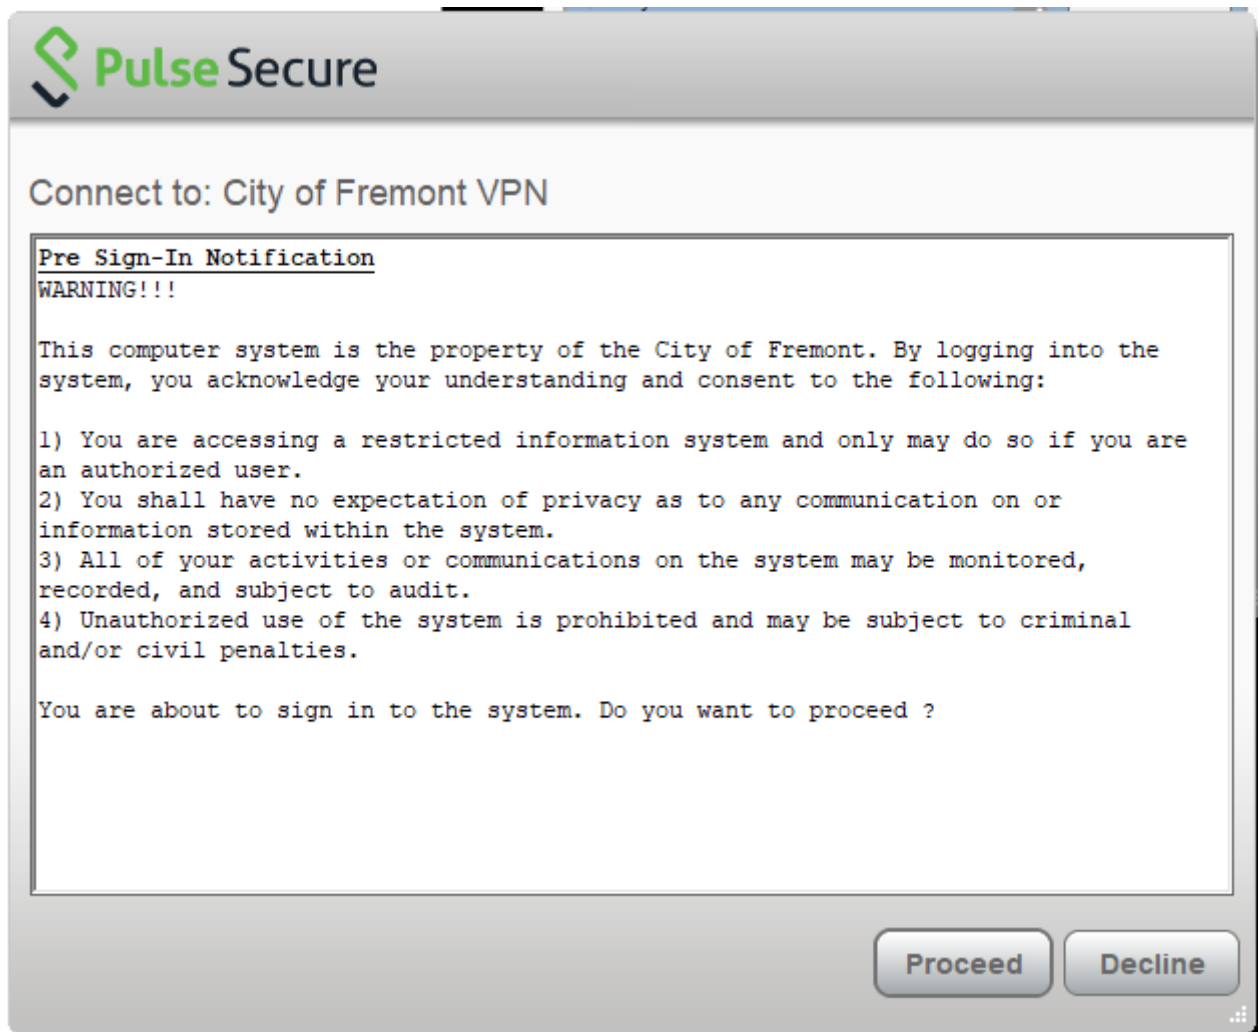

10. Provide appropriate Server URL. In this example, <https://mycof.fremont.gov/cof> is shown. City employees can use <https://mycof.fremont.gov/cof>. If you need access to CAD or Dispatch software, please use <https://mycof.fremont.gov/pd> instead. Once Name and Server URL are filled out, click “ADD” to save the information.

11. Click "Connect"

12. Click "Proceed" after reading and agreeing the notification.

13. Provide Windows credentials to connect.

14. Click "Disconnect" to disconnect or end VPN session.
